DETAILED ACTION

1. The amendments filed on April 19, 2004 and July 22, 2004 have been entered.

Drawings

- 2. The proposed drawing changes filed on July 22, 2004 have been approved. It is noted that no change has been proposed for Figure 8. However, because the appropriate change has been provided on the replacement drawing, no further action on this issue is necessary.
- 3. The replacement drawings were received on April 19, 2004. These drawings are acceptable.

Specification

4. The disclosure is objected to because of the following informalities:

In paragraph 0029, lines 2-4, the changes appear to be inaccurate and render the disclosure unclear and confusing, particularly in view of the original description provided in paragraph [0004], line 6, which describes a high limit sensor "such as a photo-detector 32 and a light source 34", and it seems that in line 2, "Sensors 32, 33 may be provided to sense a signal such as a light source 34, 35" should be changed to --Sensors may be provided to detect the presence of the dancer roll 24, wherein the sensors may include photo-detectors 32, 33 that sense a light source 34, 35-- or the like; in line 5, "32, 33" appears to be inaccurate, and it seems that it should be changed

to --32, 34 and 33, 35-- or the like; similarly, in line 11, "upper sensor 32" appears to be inaccurate, and it seems that it should read --upper sensor 32, 34-- or the like; similarly, in line 12, "lower sensor 33" appears to be inaccurate, and it seems that it should read --lower sensor 33, 35-- or the like.

In paragraph 0033, lines 2 and 4, "sensor 37" is inaccurate, and it seems that each occurrence thereof should read --sensor 37, 43-- or the like, and in line 4, --37-- should be inserted after "photo-detector-- or the like. It is noted that the replacement paragraph filed on April 19, 2004 has no markings and appears to be unchanged.

Appropriate correction is required.

Claim Rejections - 35 USC § 112, 1st paragraph

5. Claims 21 and 23-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claim 21, the specification and drawings do not appear to provide support for the cutter as recited in claim 20 further comprising a means for providing a delay time between the receiving of the synchronization signal and the providing of the actuating signal. Rather, support is provided for the "means for adjusting" performing the delay time function.

Regarding claim 23, the specification and drawings do not appear to provide support for the cutter as recited in claim 22 further comprising means for comparing the synchronization signal and a target value. Rather, support is provided for the "means for adjusting" performing the comparing function.

Regarding claim 24, the specification and drawings do not appear to provide support for the cutter as recited in claim 23 further comprising means for comparing the synchronization signal and a goal value. Rather, support is provided for the "means for adjusting" performing the comparing function.

Claim Rejections - 35 USC § 112, 2nd paragraph

6. Claims 20-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 20, line 2, the claim is vague and indefinite as to whether the cutting knife is being claimed, and it is suggested between lines 1 and 2 to insert --a cutting knife;--, and in line 2 to change "a cutting" to --the cutting-- or the like; in line 7, the recitation "means for receiving a signal ..." renders the claim vague and indefinite since sufficient structure has not been set forth to perform such a function, and it is suggested between lines 6-7 to insert --means for sensing a position of the cutting knife;--, and in line 7 to insert --from the position sensing means-- after "signal" or the like.

In claim 21, lines 1-2, the recitation "means for providing a delay time ..." is vague and indefinite as to what disclosed structure it refers; in lines 3-4, the recitation

"wherein the means for adjusting the subsequent actuating signals is further for adjusting the delay time" is vague and indefinite as to what is being set forth, particularly in view of the recitation set forth in lines 1-2.

In claim 23, lines 1-2, the recitation "means for comparing the synchronization signal and a target value" is vague and indefinite as to what disclosed structure it refers.

In claim 24, lines 1-2, the recitation "means for comparing the synchronization signal and a goal value" is vague and indefinite as to what disclosed structure it refers.

Allowable Subject Matter

- 7. Claims 1-13 are allowable over the prior art of record.
- 8. Claims 20-25 appear that they would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action. It is noted that these claims have been rejected under 35 USC 112, 1st paragraph.

Conclusion

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark F. Dexter whose telephone number is (571)272-4505. The examiner can normally be reached on Mondays, Tuesdays, Thursdays and Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer D. Ashley can be reached on (571)272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
